## Positive pressure workbench

The FagronLab™ Class II Biological Safety Cabinet is specialized to provide environmental, product, and personnel protection. Special designed for pharmaceutical laboratories that work with pathogenic biological agents (PBA). Guarantees the protection of the personnel by an air curtain in the work opening which prevents any escape of the pathogens from the work chamber. Additionally, it guarantees environmental protection for biological safety with the use of two HEPA filters. The HEPA filtered downward laminar flow protects the material that is used inside the cabinet, and the exhaust HEPA filter protects the environment, since it ensures that the air passing through it is contaminant free. The FagronLab™ CC2A2 cabinet is a new generation of safety cabinets which are easily installable in a laboratory.

- System with two HEPA filters for 70% air recycling and 30% export
- Set up functions on a readable LCD display with indicators for all operations. Operation panel and remote control
- Working area of 304 stainless steel surrounded by negative pressure. Removable for better cleaning
- Sterilization with UV lamp at 253.7nm for effective protection from contamination
